EXPERIENCE

Engineer Intern

LawsForum

Nov 2024 – Jan 2025

Delhi, India

- Published and managed blog content on the company website, enhancing content relevance and user engagement.
- Improved website SEO through keyword optimization, meta tag enhancements, and internal linking strategies.
- Edited and optimized YouTube videos to boost viewer retention and align with brand tone.

Teaching Intern

Kilkari Project (CDF)

May 2025 – July 2025

Delhi, India

- Assisting in teaching academic subjects to underprivileged students with a focus on foundational understanding.
- Designing and delivering simplified lesson plans tailored to individual learning needs.
- Engaging students through interactive sessions to boost interest and participation.

PROJECTS

Compile Academy Website | *Next.js, React.js* | [Live](#)

- Developed and deployed the official website for Compile Academy, a CBSE Class 11–12 coaching institute.
- Built a responsive and SEO-friendly platform featuring course details, faculty profiles, testimonials, and contact modules.
- Integrated inquiry and WhatsApp communication features, delivering an end-to-end client solution from development to deployment.

Personal Portfolio Website | *HTML, CSS, JavaScript* | [Live](#)

- Designed and developed a responsive personal portfolio to showcase projects, technical skills, achievements, and coding profiles.
- Implemented a modern UI with smooth animations, dark mode, and a mobile-friendly responsive layout.
- Optimized the website for SEO and deployed it with a custom domain to strengthen online presence and professional branding.

User Authentication System | *C++, STL, File Handling*

- Developed a CLI-based user authentication system supporting secure user registration and login.
- Implemented persistent credential storage using file handling and efficient lookups with the STL `map`.
- Added input validation to handle duplicate registrations and invalid login attempts.
